DETAILED ACTION***Abstract***

Applicant is reminded of the proper content of an abstract of the disclosure. A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. Also, the abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art, as in lines 4-7.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Design Patent No. Des. 381,225 (Malik '225).

Malik '225 shows a shoe rack (see marked-up Figure 1, below) for hanging on an upright surface (s) comprising first and second opposed side frame members (1 and 2) with each side frame member having a main body section (m) and a plurality of support arms (a) projecting outwardly therefrom; each arm (a) has one end (o) adjacent to the main body section (m) and another free end (f) displaced from the frame member (1 and 2); each arm (a) has at least one loop (l) extending upwardly therefrom at a location between the one end (o) and the free end (f); a plurality of shoe retaining bars (b) extend

between the side frame members (1 and 2) whereby the loops are capable of providing a barrier against lateral movement of shoes positioned on the bars (b) of the rack.
